## AVERAGE FAMILY INCOME UP 5 PERCENT IN 1964

(Advance data from March 1965 sample survey)

The median income of families in the United States was \$6,600 in 1964, according to estimates released today by the Bureau of the Census, Department of Commerce. This was about \$320, or 5 percent, higher than in 1963. The gain in real purchasing power between 1963 and 1964 was approximately 4 percent, since prices also rose during this period.<sup>1</sup>

An estimated 8.4 million families, or 18 percent of the 47.8 million families in the Nation, received money incomes under \$3,000 in 1964. The number of families in this income range declined by approximately 450,000 from the previous year. Another 8.1 million, or 17 percent, received incomes between \$3,000 and \$5,000 last year; approximately 9.4 million, or 20 percent, had incomes between \$5,000 and \$7,000; and 11.1 million, or 23 percent, had incomes between \$7,000 and \$10,000. The remaining 10.8 million families, or 22 percent, received incomes of \$10,000 or more.

For men, last year's median income advanced to \$4,600, up 3 percent, from the preceding year. The median income of women in 1964 was \$1,400, a gain of about \$80 over the 1963 median.

The 1964 income statistics presented in this report were obtained from the Bureau's Current Population Survey of March 1965. The information was collected from the civilian

noninstitutional population and members of the Armed Forces living off post or with their families on post in the United States. More detailed income data for families and persons will appear in a report in this series to be issued later this year.

This report covers money income only, prior to deductions for taxes. For detailed definitions of the terms and concepts used in this report, see *Current Population Reports*, Series P-60, No. 43. Since the estimates in this report are based on a sample, they are subject to sampling variability. Moreover, as in all field surveys of income, the figures are subject to errors of response and nonreporting.
